

Audio / Video Requirements

Computer, Projector and Screen:

Chuck's presentation will be presented from his own MacBook Air. He will also provide his own clicker for the event. All slides and videos are self-contained in his presentation so connection to the Internet is not needed. Chuck will provide or coordinate which cables are needed, the larger the screen the better.

Microphone and Audio:

Josh prefers a wireless lavalier microphone connected to a high quality audio system sufficient for the entire audience to hear sound/video clips played from Chuck's laptop. Please make sure sound system is functioning and tested before his arrival.

Podium:

Chuck does not require a podium. If one is present, he prefers it be struck to the side or back of the platform/stage.

Beverage:

Please have a bottle of water available for Chuck on stage.

Confidence Monitor:

Chuck prefers a confidence monitor at large events. This is a reflection of the presentation output from Chuck's computer.

Audio and Video Testing:

Chuck needs to perform an audio/video test no fewer than 30-minutes before his presentation.

Internet Access Not Required
